

COMPUTER INFORMATION SYSTEMS: MANAGEMENT (CISM)

CISM 11 Systems Analysis and Design

3.5 Units (Degree Applicable, CSU, UC)

Lecture: 54 Lab: 27

Advisory: CISM 11

Information systems and the discipline of systems analysis in relation to the system development life cycle. Develops skills in applying the tools, techniques, and concepts of systems analysis to information systems development. Application of structured analysis and design methods and tools, including Computer Aided System Engineering (CASE) tools.
