

LOGISTICS OPERATION SPECIALIST

Certificate of Completion #42213

This short-term program trains students for a career as a Logistics Operations Specialist in a high wage high growth logistics industry. This program will include distribution center operations, inventory control, transportation management, supplier vendors, customer relationships, and safety OSHA regulations. Students who pass the two courses will earn their Logistics Operations Specialist Certificate.

Program Learning Outcomes

- Students will be prepared to enter into entry-level logistics jobs.
- Students will demonstrate job readiness skills.
- Students will progress through the logistics career ladder by enrolling in further logistics programs.

Review Student Learning Outcomes (SLOs) (<http://www.mtsac.edu/instruction/outcomes/sloinfo.html>) for this program.
